Clickteam Fusion 2.5 is a great program, especially when you're just getting started in game design.

. Dont waste your money. I have over 3000 hours on this and its honestly just a pigeon hole when your project will need to scale beyond its limitations. What really takes the\u2665\u2665\u2665\u2665\u2665though is how much you have to "buy" just to get the full experience.

I bought the fusion 2.5 "developer version"

I had to buy most of the export addons

Bought the Fusion 2.5 + addon

This is a greedy\u2665\u2665\u2665\u2665\u2665company that charges you for "updates" (look at the fusion 2.5 + addon)

I wonder how much the next free update will "cost". These idiots charge you for basic quality of life patches. What a joke.

Whats next? Buying customer support?. MAYBE. Because when I had a problem syncing my clickteam forums account with my steam account, their foolish support staff refused to help me unless I provide my real name and details and who knows what else. Some oversensitive employee Simon Pittock quickly shut down my need for assistance over so called "abusive language" when all I said was "I paid so much for this crap". Quick to waste my time but take my money and not even try to help.

Overgrown useless morons. They take your money, cant provide good software, support

is\u2665\u2665\u2665\u2665\u2665 Stay away. Unity is a million times better or game maker.

WORST OF ALL, When I had one damn problem, JUST ONE problem I wanted help with after the thousands of dollars spent on this, I was denied and shut down hard and fast for the most trivial reason. F this company and their software.. It's pretty easy to use, you still need to follow tutorial but you will get the hang of it pretty fast and you can make fun little game in a few hours
